

Monthly Progress Report of Industrial Training – 2017/18 (relevant academic year)

Student Name : Mohamed Shibran

Student No. : IM/2014/024

Month and Year : January 2019

Report Number : 05

Organization : Apptimus Tech

Department/Section : Software development

Industrial Training Advisor (ITA) : Mr. Anojan Kaneshathas

Contact Number : 0773720606 :

Fortnightly report	Explanations/examples	Remarks (filled by the ITA)
Training Objectives: What do I plan to learn during the coming two weeks	<ul style="list-style-type: none"> To design and develop projects called “Collaborator” and “membership management”. “Collaborator” project is about managing the projects, tasks, milestones and budget of the project. “Membership management” project is about managing the membership, packages, payments and attendance of the customers. 	
Methods of Assessment (what I have learnt and achieved)	<ul style="list-style-type: none"> We discussed about the requirements of the collaborator and designed the database. We used Laravel for the back-end. I developed the API parts for projects, milestones, tasks, packages and payments. After finishing the backend, we gave it to the QA team as usual, to test them with the test cases needed for the project and corrected the corrections said by them. 	

	<ul style="list-style-type: none"> • After this, we started developing the frontend part using JavaScript, jQuery, bootstrap. • In the middle of this project, we did “Membership management” as one day project. • I was in the backend part designed using Laravel (API). • I developed some API for back-end. 	
What issues did I encounter	<ul style="list-style-type: none"> • That day was very tough as we had to finish the one-day application. But its was a best practice to work under the time limit. 	
Any suggestions to improve the work place: Any issues that I resolve or propose: alone/ with assistance		
What are the issues unresolved or what concept you could not learn? Why did you fail to resolve/learn them?		
No of days attended No of days absent	<p>Attended days Week1: 5days Week2: 5days Week3: 5days Week4: 3days</p> <p>Absent days Week1: 0days Week2: 0days Week3: 5days Week4: 0days</p>
